Learn about coffee

CAFFEINE

Caffeine is one of the 1,500 components of coffee. It is known to have a positive effect on the body if it is consumed in moderate quantities. The amount of caffeine in coffee depends on several factors. Arabica beans contain 1.5% caffeine, almost twice as much as Robusta beans.

BARISTA

The quality of the coffee that reaches the guest depends on the knowledge of the barista who prepares it. Knowledge of coffee itself, adequate preparation and use of all devices are the main items in the training of a professional barista. His/her/their dedication is especially important when preparing specialty coffees, due to their sensitivity.

LATTE ART

Latte art is a method of combining coffee, milk and milk cream that results in a certain drawing on the surface of the drink. The quality of the drawing depends on the coffee itself, the quality of the milk cream and the skill of the barista. In addition to the symmetry of the drawing, the contrast between coffee and milk is especially appreciated.

THE COFFEE BELT

"Coffee belt" – a belt around the equatorial zone in which there are excellent conditions for growing the coffee plant, within which micro-zones have formed over time that give coffees a unique stamp.

COFFEE BODY

This is the term used to describe the physical characteristics of coffee - the fullness of taste and texture that we feel in our mouths when drinking coffee. We can distinguish coffees with a lighter, medium or fuller body, intense, as well as those with such a pronounced body that they act like oils and syrups.

ESPRESSO

Espresso is a hot drink that is obtained by passing water under pressure through a filter with finely ground coffee, giving about 30ml of concentrated coffee on the surface of which cream is formed. Depending on the wishes of the guests, there are several variants of different intensities, as well as options with or without milk.

Vietnam Whiskey Barrel Aged Coffee

100% Arabica

This coffee is one of the favorite specialties in the world.

The process by which this coffee is widely known is such that the fully washed coffee is left to age in wooden oak barrels. The secret lies in the fact that the casks are soaked with Single Malt whiskey beforehand, which gives the coffee its authentic taste.

This process adds to the coffee a slight acidity and a gentle spicy note, a distinct aroma of Scotch whiskey mixed with a dark chocolate flavor that comes at the end.

Brew bar

Alternative methods of preparation give a different coffee profile compared to classic espresso.

While a great espresso requires a perfectly tuned machine, these drinks use simple hand-made accessories - such as glass jugs and paper filters. The preparation requires a basic Knowledge of coffee, the fineness of grinding the beans, the time required for filtering and the required pressure. The final product is a specific drink that can be drunk hot or cold and is the right option for all those who want to try our Arabicas in a different light.

AEROPRESS 250ml | **395** rsd

V60 DRIPP 250ml | **380** rsd

Cold brew

250ml | **370** rsd

Cold brew is a special way of preparing coffee in order to get the finest flavors from the bean itself. The beans are ground coarsely or extra coarsely (coarse/extra coarse grind) and then immersed in water at room temperature where they are aged for at least 12 hours in order to obtain the finest aromas and oils from the bean itself.

RASPBERRY JUICE 0,2l

455 RSD

Its best edition.

The area of western Serbia is a perfect place for growing raspberries. We chose the Vilamet variety, the highest quality and tastiest variety, enriched it with acacia honey and created a perfectly balanced taste.

Innovative in its recipe and authentic in its taste, raspberry juice is extremely rich in powerful antioxidants, which have an anti-inflammatory effect and prevent the action of harmful bacteria and fungi. Among them are anthocyanins that give raspberries their red color, resveratrol that slows down aging, and ellagitannin that has anti-cancer properties.

FULL OF VITAMINS – raspberry contains primarily vitamin C, as well as vitamins B, E and K. Raspberries also contain potassium, magnesium, manganese, copper. Cleans blood vessels and helps regulate blood sugar levels – raspberry ketones have a beneficial effect on blood sugar levels and stimulate fat metabolism, thus preventing their deposition in the body. Also, this fruit is rich in plant fibers that stimulate digestion.

STRAWBERRY JUICE 0,2l

455 RSD

A taste that the youngest simply adore, and it brings us, who are now adults, back to our childhood and awakens emotions from our childhood and the time when everything had a perfect taste.

Loft berry Strawberry juice is tasty and refreshing. This fruit preserves vision, boosts immunity, protects the body from free radicals and "erases" wrinkles! Because of all this, nutritionists recommend it!

Strawberries are rich in vitamin C and A, fiber, have plenty of iron and folic acid. In addition, they are good if you have problems with spring allergies.

BLUEBERRY JUICE 0,2l

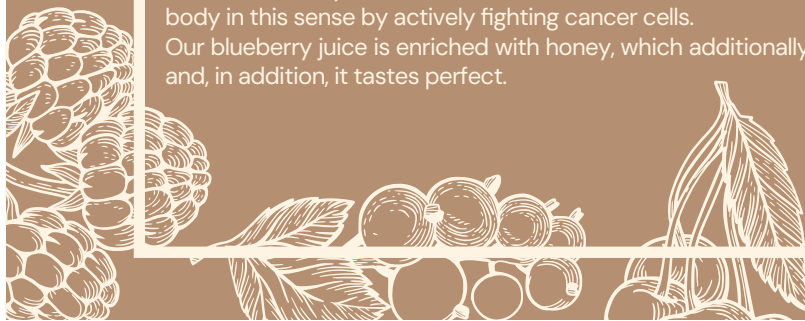

455 RSD

There is power in small berries. This is also proven by the blueberry, a fruit that is a treasure trove of vitamins and minerals, and whose tiny fruits do wonders for our heart, brain and digestion. In addition to having a small number of calories and thus standing on the way to obesity, blueberries also have an effect on improving the image of our health. Numerous studies have shown that blueberries contain certain compounds that prevent the reproduction of bacteria that cause urinary infections, as well as their retention on the walls of the bladder.

Blueberry strengthens bones, improves vision, maintains concentration, strengthens the brain. It regenerates the skin and lowers elevated blood sugar. Blueberry is one of the largest natural antioxidants and contains a large amount of vitamins, minerals and trace elements. It slows down the aging of the whole body, so without exaggeration we can call it the elixir of health and youth.

Blueberry is recommended as a dietary supplement for people suffering from malignant diseases. Anticyanin, which is found in blueberries and is responsible for its blue color, protects our body in this sense by actively fighting cancer cells.

Our blueberry juice is enriched with honey, which additionally positively affects all the listed benefits and, in addition, it tastes perfect.

Beer

Meet Real Beer

Craft beers:

Craft breweries emphasize traditional beer-making methods, carefully choosing ingredients without artificial additives, in order to obtain a quality beer with certain aromatic notes as a result. Craft beers are known for being of higher quality than commercial beers. Take advantage of the opportunity and delight your senses with innovative beer styles characterized by full body, variety of tastes and richness of aromas.

TUBI

feel the happiness

Tubi 60 is a unique alcoholic drink (40% Alc) created with a pure and ambitious desire to present to the world a drink that is superior to others in terms of ingredients, taste, versatility and most importantly - effect. It was developed in 2012 according to the recipe of two brothers from Israel - Hilal and Ianai Tubi.

The long development process involved scientists, food experts and botanists who further contributed to perfecting the drink.

An alcoholic drink based on citrus fruits, with over 100 different plants, spices, flowers and tree extracts brings happiness and removes hangovers. It is extremely easy and pleasant to drink directly or in the composition of various cocktails and, most importantly, a drink that makes people so happy that they want to share it with their friends

Tubi 60 is so recognizable that it stands out as the king of a whole new category of spirits. It is made from completely natural ingredients of the highest quality.

TUBI IS LIQUID EUPHORIA

MORE THAN ALCOHOL.

Tartine

OUR
FRESH
PASTRIES

all day

Tartine originated in the Middle Ages, and was made on a slice of bread that was spread with butter, then the French changed it into an open sandwich, and today's definition retains a slice of bread with a creative arrangement and combination of ingredients. In the past, it was mostly made as a small meal in the evening, as a light dinner, today we consume it throughout the day in different variants, choose your own.

TARTINE POPEYE | 670 *rsd*

Buckwheat bread, spinach, eggs, sour cream, pancetta,

TARTINE WITH AVOCADO AND EGGS | 740 *rsd*

Buckwheat bread, cherry tomatoes, eggs, olive oil, zucchini, avocado spread

TARTINA VEGE | 640 *rsd*

Buckwheat bread, hummus, zucchini, peppers, mushrooms, baby spinach

TARTINE WITH SALMON | 790 *rsd*

Buckwheat bread, smoked salmon, cream cheese, onion, lemon, capers, cherry tomatoes

Buckwheat is an extremely healthy grain, rich in plant fibers. It is linked to the improvement of digestion and regulates the level of cholesterol and sugar in the blood. Eating buckwheat bread will help maintain a normal body weight. A cup of buckwheat flour contains 75% of the necessary intake of magnesium, which is lacking in people with Western cooking habits, as well as iron, phosphorus, manganese and zinc. In our country, Prijepolje is known for the cultivation of buckwheat and recipes made from buckwheat flour.

Bagel

all day

The bagel was created in 1610 in Poland. It is characteristic that it is first cooked and then baked, which gives it a more compact interior and a crispier exterior. Today, the bagel is the most popular in North America and is made in the shape of a circle with a hole in the middle.

OUR SIDE SALADS

Pizza Romana

after 12:30 p.m.

Romana pizza is an example of traditional tastes and cooking techniques of Roman cuisine. It is believed to have been created by the working class in Rome, where bakers sold it in square pieces. It is characterized by a crispy, thin structure, which is why it is also known as scrocchiarella, which means crispy in Italian. It is mostly oval in shape and the dough is covered with a thin layer of tomato sauce and selected ingredients that can vary, but the most traditional combination would include mozzarella, anchovies, capers, chopped basil and pecorino.

Have you tried pizza Romana yet? It is great to eat at any time of the day and to share with friends. We have tried it and present you a couple of combinations for your enjoyment.

ROMANA MARGARITA | 1110 rsd

Dough, tomato sauce, cheese, oregano, olives

PLAYROOM / CHILDREN'S BIRTHDAY ROOM

LOFT KIDS IN TWO LOCATIONS

PARK NOVI RESTAURANTS

The playroom and Children's birthday Room LOFT KIDS within PARK NOVI RESTAURANTS covers an area of 400 m² and is intended for active entertainment and education of children. It provides services for celebrating children's birthdays and daily games for children aged 0 to 10 years. A safe, clean and pleasant space with our professional animators will provide your child with an unforgettable experience and for you a little break in the cafe located in the playroom itself or the COFFEE AND FOOD bar - Loft located above the playroom / children's birthday playrooms in the PARK NOVI RESTAURANTS.

Address : Rodoljuba Čolakovića BB Str.

Phone: 062/322-300

LOFT RIVER

During the summer months, LOFT KIDS organizes free creative workshops for children at LOFT RIVER. The workshops are intended for children aged 3 to 8 years. This location offers a playground for children located in the shade, which is why it is very practical for organizing children's birthday parties with LOFT RIVER's food and drink offer.

Address: Sunčani kej BB Str., left side of Štrand
